Tompkins County COVID-19 Data Table Explained

CHS: Cayuga Health System   **TCHD:** Tompkins County Health Department
ECLRS: Electronic Clinical Laboratory Report System (NYSDOH)

CHS reports all COVID-related hospitalizations daily to TCHD. TCHD then reports active COVID-19 patients — those being monitored during the isolation period. Patients who are released from isolation, but are still recovering in the hospital are not included in this number.

The Medical Examiner reports this information to TCHD.

TCHD reports new unique positive cases based on a secure State system. NYSDOH case investigators follow-up with any individual who has a positive test

Active COVID-19 Hospitalizations	Total TC Resident Deaths

Total test samples reported in NYS ECLRS.

The cumulative number of lab confirmed positive cases since 3/14/2020. Tompkins County residents only.

Total Tests	Daily Tests	New Positive Cases	Total Positive Cases

Daily tests are the total of both positive and negative test results reported in ECLRS. The number reported here is for the previous day.

Daily Positive Self-Tests Reported	Total Postive Self-Tests Reported	NYS Vaccine Tracker 1st Dose	NYS Vaccine Tracker Completed

COVID-19 positive self-test (home-test) results reported to TCHD through the online reporting

A cumulative total of the COVID-19 positive self-test results reported to TCHD.

Vaccination data is taken from the NYS COVID-19 Vaccine Tracker dashboard.
