Here are a few facts about the **Tompkins County Office for the Aging's Person Emergency Response System (PERS) Program** operated in conjunction with Doyle Medical Monitoring .

- ◆ Doyle's average response time is less than 45 seconds
- ◆ Transmitter in pendant has a 300-500 foot range, depending on building structure
- ◆ Pendant is permanently sealed so it can be worn during bathing and showering
- ◆ Pendant is easily cleanable with a mild soap solution
- ◆ If the life of the battery is running low, a signal will alert Doyle and the Office for the Aging Staff will come to your home to replace the pendant, free of charge
- ◆ Doyle base units have a 32 hour back-up battery should there be a power outage
- ◆ Blocked/Reduced pendant signal will be automatically detected by Doyle Medical Monitoring and you will be contacted to determine the source of the interference, and problem will be resolved
- ◆ Doyle's supervised system "self-tests" once a week to ensure the unit is plugged into the phone line and functioning properly
