

ITHACA-TOMPKINS COUNTY TRANSPORTATION COUNCIL

2017-2021 TRANSPORTATION IMPROVEMENT PROGRAM

JUNE 2016

ABSTRACT

TITLE: 2017-2021 Transportation Improvement Program (TIP)

AUTHOR: *Ithaca-Tompkins County Transportation Council*

SUBJECT: Five-year program of federally funded transportation planning projects to be accomplished within Tompkins County, the planning region for Ithaca-Tompkins County Transportation Council, Metropolitan Planning Association for the Ithaca Urbanized Area.

DATE: June 21, 2016

SOURCE OF COPIES: Ithaca-Tompkins County Transportation Council
121 East Court Street
Ithaca, New York 14850
(607) 274-5570

The 2017-2021 TIP may be viewed on the Internet at: <http://www.tompkinscountyny.gov/itctc/tip>

NUMBER OF PAGES: 79

ABSTRACT: The purpose of this document is to provide members of the metropolitan planning organization, transportation providers, the general public, and other affected groups and individuals with a general description of the transportation planning activities to be accomplished during the period from October 1, 20016 through September 30, 2021, utilizing Federal funds.

This document is in accordance with the final Metropolitan Planning Rule (23 CFR Part 450 and 49 CFR Part 613, Federal Register Volume 72, No. 30, February 14, 2007) as it pertains to the development of the Transportation Improvement Program (§450.324). The document also considers the contents of a notice of proposed rulemaking for the Metropolitan Planning Rule (23 CFR Part 450 and 49 CFR Part 613, Federal Register Volume 79, No. 105, June 2, 2014).

Comments regarding the contents of this document should be directed to the Director of the *Ithaca-Tompkins County Transportation Council*.

ADOPTION AND AMENDMENTS: The Planning Committee reviewed the draft TIP on February 16, 2016, April 19, 2016 and June 21, 2016, and recommended approval of the document to the Policy Committee.

The Policy Committee approved the TIP on June 21, 2016 via Resolution 16-05 *Adopting the 2017-2021 Transportation Improvement Program*.

The preparation of this document was financed through grants from and disseminated under the sponsorship of the Federal Transit Administration and the Federal Highway Administration (U.S. Department of Transportation). The United States Government assumes no liability for its contents or use thereof.

OVERVIEW

FEDERAL REQUIREMENTS

Under Section 134 of Title 23, United States Code and Section 5303 of the Federal Transit Act of 1964, as amended by the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) and the Transportation Equity Act for the 21st Century (TEA-21) and the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy For Users (SAFETEA-LU), and the Moving Ahead for Progress in the 21st Century Act and currently, the Fixing America's Surface Transportation Act (FAST-Act), the Congress of the United States has stated that:

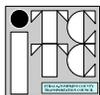

"It is in the national interest to encourage and promote the development of transportation systems embracing various modes of transportation in a manner which will efficiently maximize mobility of people and goods within and through urbanized areas and minimize transportation-related fuel consumption and air pollution. To accomplish this objective, metropolitan planning organizations, in cooperation with the State, shall develop transportation plans and programs for urbanized areas of the State. Such plans and programs shall provide for the development of transportation facilities (including pedestrian walkways and bicycle transportation facilities) which will function as an intermodal transportation system for the State, the metropolitan areas, and the Nation. The process for developing such plans and programs shall provide for consideration of all modes of transportation and shall be **continuing**, **cooperative**, and **comprehensive** to the degree appropriate, based on the complexity of the transportation problems."

In accordance with this directive, Metropolitan Planning Organizations (MPOs) are designated for each urbanized area of more than 50,000 population by agreement between the Governor

and units of general purpose local government. It was originally determined that the Ithaca area had achieved "metropolitan" status after the 1990 Census,

On September 30, 1992, the Governor of the State of New York joined with the County of Tompkins, the City of Ithaca, the Town of Ithaca, the Villages of Lansing and Cayuga Heights in executing the Memorandum of Agreement formally designating the Ithaca-Tompkins County Transportation Council (ITCTC) as the MPO for the Ithaca-Tompkins County Urbanized Area. In December of 1994, the ITCTC expanded its Metropolitan Planning Area Boundary to cover all of Tompkins County. In conjunction with this geographic expansion, the membership of the ITCTC was expanded to include the remaining eight Towns in the County. In November 1996 the Memorandum of Agreement was amended to include the Town of Dryden as a voting member of the ITCTC Policy Committee.

The latest final Metropolitan Planning Rule (23 CFR Part 450 and 49 CFR Part 613, Federal Register Volume 72, No. 30, February 14, 2007§450.324) requires that " the MPO in cooperation with the State and any affected public transportation operators shall develop a Transportation Improvement Program (TIP) for the metropolitan planning area". This TIP must cover a period of no less than four years, must be updated at least every four years, must be approved by the MPO and the Governor, and must be financially constrained by (federal fiscal) year and by funding category. The TIP must consider all projects or phases within the metropolitan planning area proposed for funding under Title 23 of the United States Code, the Federal Highway Act, and Title 49 of the United States Code, the Federal Transit Act (with certain exceptions as specified in 450.324(c)(1)).

MPO STRUCTURE

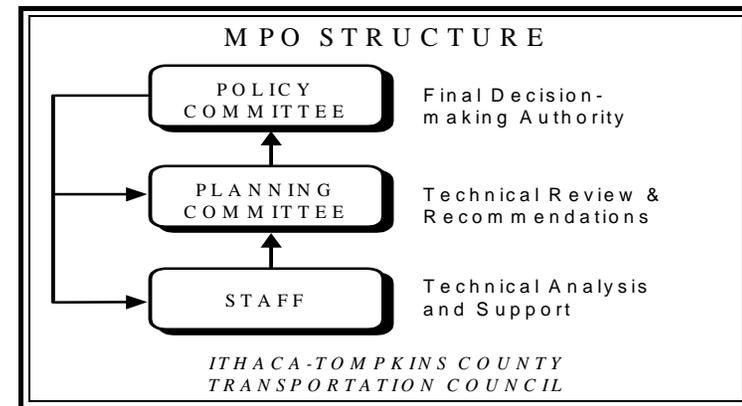

As the designated MPO for the Ithaca metropolitan area, the *ITCTC* is responsible for conducting a transportation planning process that is "*continuing, cooperative, and comprehensive*". In order to achieve this objective, the *ITCTC* is structured at three levels.

The **Transportation Policy Committee** is the final MPO decision-making authority. Its primary local member governments include Tompkins County, City of Ithaca, Towns of Ithaca and Dryden and Villages of Cayuga Heights and Lansing. Their highest elected officials represent each of these in the Policy Committee. A representative of the New York State Department of Transportation, which represents the Governor, sits as the final primary voting member. Cornell University, Tompkins Consolidated Area Transit, the Towns of Caroline, Danby, Enfield, Groton, Lansing, Newfield, and Ulysses, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) are also represented as non-voting members. The voting members of the Policy Committee have agreed to act by "consensus". [*"Consensus means no negative vote is cast by an affected voting member present at the meeting. An abstention is not counted as a negative vote."* Section II.A.3 of the Unified Operations Plan.]

The **Transportation Planning Committee** is responsible for coordinating and managing the area's transportation planning activities and providing technical advice to the Policy Committee. The Planning Committee is composed primarily of lead technical staff members from the member entities and local transit operators.

The **Central Staff** is responsible for performing the administrative and technical services necessary to operate the MPO. The efforts of the Central Staff are supplemented by the "in-kind services" of various participants in the MPO process.

The Unified Operations Plan, adopted by formal resolution in August 1992 and updated on May 2000 and May 2015, guides the operations and procedures of the ITCTC. This document specifies that the Transportation Planning Committee has the principal responsibility for the preparation of the Transportation Improvement Program (UOP Section II.B.7.d).

PROJECT SCREENING PROCESS

The *Ithaca-Tompkins County Transportation Council* works in partnership with the *New York State Department of Transportation-Region 3* (Syracuse, New York) in order to develop a Transportation Improvement Program that is compatible with the State planning goals and available federal funds. The TIP development process involved four basic phases:

I. Estimating Available Funds: Available highway funds were estimated in cooperation with NYSDOT Region 3. NYSDOT Main Office provided the Regions with regional allocations based on federal apportionments levels. Region 3 produced sub-allocations for the ITCTC area that were reviewed by ITCTC staff and the ITCTC Planning Committee. It is the ITCTC's understanding that the final TIP reflects reconciliation of estimated resources for the ITCTC area with those of the rest of NYSDOT Region 3, including the Syracuse Metropolitan Transportation Council.

Available transit funding was determined from the Federal Register in coordination with NYSDOT and Tompkins County as the designated recipient of Federal Transit Administration (FTA) funds. Tompkins County worked closely with TCAT to develop the FTA Tables included in the TIP.

Sponsors of already programmed projects were asked to update the funding needs and schedules for existing projects. Funding was then programmed based on available funding estimates for the ITCTC planning area, ensuring that programmed funding never surpassed available federal funding in order to achieve the goal of fiscal constraint (i.e. programmed funds do not exceed the ITCTC sub-allocations).

II. Project Solicitation: Eligible participants, including municipalities, county, state and transit representatives, were asked to submit fundable proposals for their priority transportation projects consistent with the federal aid surface transportation programs. Submissions were made directly to the ITCTC.

III. Project Evaluation: Projects were reviewed by ITCTC staff, and NYSDOT. Evaluation of projects was based on project factors such as implementation schedule, project readiness, requested funding levels and other planning factors specific to each project. The TIP project sponsors worked in a series of meetings to develop a draft list of projects to be presented to the Planning Committee.

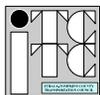

IV. Project Programming: The ITCTC Planning Committee reviewed the recommended list of projects to ensure it supports the agency's Long Range Transportation Plan (LRTP) and to ensure coordination with local plans, budgets, schedules and projects. The projects in the resulting priority list were assigned to the appropriate federal-aid funding programs. Projects were then programmed based on available funding estimates, ensuring that programmed funding did not surpass available federal funding in order to achieve the goal of fiscal constraint. Final approval of the TIP took place after a public outreach and review process.

PROJECT SELECTION PROCESS

"Project Selection" is a term that is applicable in conjunction with the management of the approved Transportation Improvement Program (TIP) and the Statewide Transportation Improvement Program (STIP). It is not the process used to identify projects that would be added to the TIP and/or STIP. That process is described above under 'Project Screening'. Under the Metropolitan and Statewide Planning Rules and Regulations (23 CFR Part 450 and 49 CFR Part 613, Federal Register Volume 72, No. 30, Wednesday, February 14, 2007), the term "Project Selection" refers to the process or mechanism used to manage project implementation from an approved and fiscally constrained TIP and/or STIP.

The Project Selection Process authorized by the *Ithaca-Tompkins County Transportation Council* is based on a process that was developed and suggested by New York State Department of Transportation to provide statewide compatibility between MPO and State DOT processes. The process described below shall be considered as an integral component of the Transportation Improvement Program approved by the *Ithaca-Tompkins County Transportation Council*.

1. Projects identified in the first year of the TIP/STIP have first right to the funds available. To the extent that all the projects are ready to

- be authorized and the actual costs match the programmed costs, no Project Selection is required.
2. If the value of a project or projects in the first year of a TIP/STIP increase from the programmed cost when it is ready for authorization, it will be necessary to maintain the fiscal integrity of the fund category in the Federal Fiscal Year in order to obtain Federal authorization. Generally, this will require that savings in other first-year projects be identified. If that cannot be demonstrated, other first-year projects (or phases) would need to be deferred to later years. If they are deferred to later years, it is important to remember that fiscal balance in years 2 and 3 of the TIP/STIP must also be maintained. This may necessitate deletion of scheduled projects in years 2 or 3, or deferral to years 4 or 5. Even though this sounds onerous, it often entails only minor schedule change of a project (e.g., September 2016 to October 2016).
 3. It is occasionally necessary to revise the fund category in order to ensure timely authorization of an approved project. It is proposed that this action be permitted under project selection if the fiscal integrity of each affected fund category is maintained.
 4. The most likely situation that would require Project Selection occurs as a result of savings incurred as a project is authorized (or bid) or when the schedule of a project slips causing the authorization to be deferred to a subsequent Federal Fiscal Year. In these instances, it will be necessary to select a project from the second or third year of the TIP/STIP for authorization if the lapsing of funds in the current Federal Fiscal Year is to be avoided.
 5. The basis for selecting Title I (highway) projects from years 2 and 3 or revising fund categories would be, to the extent possible, to select a project that is ready to be authorized from the same geographic area (MPO or non-metropolitan area), then from the same NYSDOT Region, and finally, from anywhere within the State. For Title I (highway) projects, NYSDOT will be responsible for project selection and, if necessary, revising the fund category.
 6. It is proposed that for Title III (transit) projects, the grantee is permitted to select project(s) from years 2 and/or 3 of the TIP/STIP to replace first-year project(s) of equal value that will not be ready for authorization at the time the grantee prepares and submits the grant application to the FTA. If the grantee does not have projects in years 2 and/or 3 of the TIP/STIP, the grantee will consult with the MPO and with NYSDOT in order to identify other Title III projects in the TIP/STIP that can be authorized in the first year.
 7. For Title I funded projects, the Department will report to the MPO on a quarterly basis if the Project Selection procedures are implemented. Similarly, for the Title III funded projects, the Transit Operator will report to the MPO on a quarterly basis if they utilize the Project Selection procedures in submitting a grant application to the FTA.

COORDINATION

Long Range Transportation Plan

The majority of the projects in the TIP are aimed at increasing the efficiency and safety of the transportation system. This approach reflects the general philosophy, articulated in Federal legislation and NYSDOT's guidance, encouraging strong asset management practices that focus investments in current infrastructure through preventive, corrective and demand maintenance, with the aim of preserving the functionality of the existing transportation system.

The TIP seeks to provide components for an integrated transportation system that is multimodal in nature, provides for the relief of vehicular congestion and maximizes the mobility of people and goods. The project development process acknowledges the limited funding resources available to meet the costs of new construction, improvements and maintenance. The increased need to address concerns over energy conservation, the environment and air quality, interests of bicyclists and pedestrians, and concerns over preservation of neighborhoods and the vitality of local areas, require a strategic Transportation Improvement Program.

The Transportation Policy Committee approved the ITCTC's 2035 Long Range Plan, on December 2014. The projects contained within

this TIP are in conformance with the goals, policies and recommendations articulated in the long-range transportation plan.

Transportation Systems Management

Transportation Systems Management (TSM) is the name given to the concept of more efficiently using existing transportation systems by means other than large-scale new construction. TSM embraces a host of measures, all with the purpose of seeking to achieve better results from existing facilities rather than creating new highways and transit systems. These measures tend to be subtle, low-cost, and can be implemented rapidly compared to new capital construction. All tend to have minimal or no right of way space required as they are fitted into or on existing systems or are simply policies applied to whole areas. The rising costs of construction and operation of new facilities coupled with the level of available funding and the environmental, social, cultural and economic concerns of the area's residents and officials, have led to a greater emphasis on TSM activities in the Ithaca-Tompkins County Metropolitan Area.

Special Efforts for the Elderly and Disabled

The passage of the Americans with Disabilities Act of 1990 (ADA) has accelerated trends towards a comprehensive demand-responsive transit network and the development of accessible line-haul service. All projects to be completed as part of the 2017-2021 Transportation Improvement Program will be completed in conformance with the pertinent requirements of ADA.

Air Quality

Tompkins County is classified as an air quality "attainment" area under the Clean Air Act Amendments of 1990 (CAAA). As such, no technical conformity analyses have been completed. The Long Range Transportation Plan includes specific policy strategies intended to assist in maintaining compliance with National Ambient Air Quality Standards (NAAQS) in the greater Ithaca-Tompkins County Metropolitan Area.

Energy

No specific energy audits were conducted as part of the TIP process. No Regionally Significant Projects or Significant Project Changes have been identified in this TIP. However, the Long Range Transportation Plan emphasizes transportation investments, which optimize energy conservation efforts. This TIP includes TSM, transit and bicycle/pedestrian projects that will have a positive impact on energy conservation efforts.

Public Participation

In December of 1993, the *Ithaca-Tompkins County Transportation Council* formally adopted its Public Involvement Procedures (PIP). These procedures were last updated June 26, 2007. In developing the TIP every effort was made to comply with federal requirements (23 CFR Part 450 and 49 CFR Part 613, Federal Register, Volume 72, No. 30, Wednesday, February 14, 2007), including broader outreach to environmental, historic and other special interest community groups, and state and local government agencies. The Public Involvement Procedures address topics such as meeting notification, information access and availability, and public involvement in the planning process of the MPO. The procedures provide general-purpose thresholds for community participation on a general and continuous basis. The public has been notified and invited to participate in the development of the TIP through such channels as direct proposal solicitation, advertisements, use of list serves, web access and other media outreach efforts.

IMPACT ANALYSIS

- **Special Populations and Resources**

ITCTC staff utilized available Geographic Information System (GIS) data to analyze the impact of TIP projects on environmental and historic resources, and to determine their potential effects on minority, low income and elderly populations.

TIP projects involve inspection, maintenance or reconstruction of existing transportation facilities. These projects will not substantially change the “footprint” of the facility or its scale. As with any capital project there are bound to be interruptions in service, detours, etc. These are considered temporary in nature and are mitigated on-site during project implementation.

The impact analysis on special populations or resources did not identify significant adverse or unequal impacts resulting from the distribution and location of any TIP projects. The maps generated for this analysis can be found in the TIP Maps section at the end of this document.

- **Performance Measures**

The ITCTC’s 2035 Long-Range Transportation Plan (Chapter 3: www.tompkinscountyny.gov/itctc/lrtp) includes a series of measurable objectives that are accompanied by performance measures and targets to be achieved. The table in the following page, titled ‘TIP Performance Measures Analysis’, shows the expected area of impact of each of the projects included in the TIP. The exact impact of a project cannot be determined until it is built. Overall performance for the LRTP objectives is tracked over time and reported to the ITCTC. The bulk of the funding in this TIP is dedicated to repair and maintenance of the existing infrastructure. As a result, it is not surprising that Safety and Infrastructure performance objectives are the most affected by the 2017-2021 program.

FUNDING CATEGORY DESCRIPTIONS

Federal funding sources have statutory restrictions that limit their use to certain eligible purposes. This in turn influences the ultimate allocation of funding for different project types during TIP development. This summary description of different funding sources is included to provide interested parties with the contextual

framework within which to understand funding options and possibilities.

- **National Highway Performance Program (NHPP)**

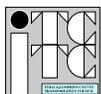

NHPP supports improvement of the condition and performance of the National Highway System (NHS). The National Highway System was approved by Congress in 1996 and includes approximately 165,000 miles of Interstate system and other major highways. Highways included in the system were designated by the states working with the USDOT. In the Ithaca-Tompkins County Metropolitan Area the only NHPP-eligible facilities are NY State Route 13 (known as Fulton Street/Meadow Street/Elmira Road within the City of Ithaca) and NY State Route 79 from Fulton Street in the City of Ithaca east/southeast to the Tompkins/Tioga County Line in the Town of Caroline.

NHPP funds can be used for any project to improve or maintain infrastructure (pavement, bridges, etc.), safety, mobility or freight facilities, intelligent transportation systems, environmental restoration, natural resource mitigation and other programs within NHS corridors. Bicycle and pedestrian facilities are also eligible expenses.

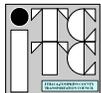

- **Surface Transportation Block Grant (STBG) –**

The FAST Act converted the long-standing Surface Transportation Program into the Surface Transportation Block Grant Program. STBG remains the federal-aid highway program with the broadest eligibility criteria.

STBG Funding is allocated to several subcategories each with their own use restrictions.

2017-2021 TIP PERFORMANCE MEASURES ANALYSIS			Expected TIP Project Impact (see more detailed performance measure definitions below):											ENVIRONMENTAL SUSTAINABILITY

			Performance Measure Definitions:					Performance Measure Definitions:					Performance Measure Definitions:				
			1. Reduce the # of Accident Fatalities/Serious Injuries?					6. Reduce PM Peak hour Congestion?					8a. Reduce annual vehicle-miles-traveled per capita?				
			2. Reduce the # of Bike-Ped accidents?					7a. Increase transit service?					8b. Reduce the countywide carbon dioxide emissions?				
			3. Reduce the # of Bike-Ped Fatalities/Serious Injuries					7b. Increase the miles of multi-use trails?					8c. Promote growth in urbanized area/villages?				
			4. Reduce the # of structurally deficient bridges?					7c. Increase the miles of roads with bike lanes?					8d. Reduce the number of vehicles needed per household?				
			5. Reduce the miles of State Roads in 'poor' condition?					7d. Encourage more non-"drive alone" trips?									
								7e. Increase or improve sidewalks?									

STBG-Flexible: The STBG provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals. (<http://www.fhwa.dot.gov/fastact/factsheets/stbgfs.cfm>). These funds may also be ‘flexed’ to the Federal Transit Administration (FTA) for transit use.

Off-System Bridges: States are required to obligate a portion of STBG funds for bridges not on Federal-aid highways (off-system bridges).

Transportation Alternatives (TA) – The FAST Act provides for funding for transportation alternatives (TA) as a set-aside of the STBG. TA eligible projects were included under previous federal legislation as the transportation alternatives program (TAP), transportation enhancement program (TEP), safe routes to school (SRTS) and recreational trails programs (RTP). TA projects are federally funded, community-based projects that expand travel choices and enhance the transportation experience by integrating modes and improving the cultural, historic, and environmental aspects of our transportation infrastructure. TA projects must be one of 10 eligible activities and must relate to surface transportation.

Ten eligible activities:

1. Pedestrian and bicycle facilities
2. Safe routes for non-drivers
3. Conversion of abandoned railway corridors to trails
4. Scenic turnouts and overlooks
5. Outdoor advertising management
6. Historic preservation and rehab of historic transportation facilities
7. Vegetation management
8. Archaeological activities
9. Storm water mitigation
10. Wildlife management

The awarding of TA funds is based on a statewide competitive grant process.

- **Highway Safety Improvement Program (HSIP)**

The FAST Act distributes funding to States by formula under the HSIP. The HSIP goal is to achieve significant reduction in traffic fatalities and serious injuries. It includes highway safety improvement strategies, activities or projects on public roads that are consistent with the State Strategic Highway Safety Plan (SHSP) and correct or improve a hazardous road location or feature or addresses a highway safety problem. Eligible activities include: vehicle-to-infrastructure technologies, pedestrian hybrid beacons, median separation, and other physical infrastructure safety projects.

- **Federal Transit Administration**

The planning regulations require that the TIP include projects funded under several Federal Transit Administration (FTA) programs. FAST Act legislation provides the ability to transfer funding between programs (e.g., from STBG to FTA Section 5307) in order to best meet local/statewide needs. The FTA implements the federal program as authorized by the FAST Act and funded by annual appropriations. Each reauthorization amends the Federal Transit Laws codified in 49 USC Chapter 53.

FTA Funding Programs:

Section 5309: This program provides discretionary capital funds for the acquisition and/or construction of capital facilities (e.g., rolling stock, major terminals, etc.).

Section 5307: This program provides grants to Urbanized Areas (UZA) for public transportation capital, planning, mobility management projects, as well as operating expenses in certain circumstances. There are two basic sub-categories of this program: Operating Assistance and Capital/Planning. Operating Assistance is provided to urban area transit systems on a formula basis to

subsidize the general operations of the transit service. Capital/Planning funds are available on grant application.

Section 5310-urban: This program formula funding to increase mobility of seniors and persons with disabilities. Projects awarded from Sect.5310 are required to be in the Tompkins County Coordinated Human Service and Public Transportation Plan (<http://www.tccoordinatedplan.org/>).

Section 5310-rural: Similar in purpose to 5310-urban but for use in rural areas. This grant program is managed by NYSDOT and is highly competitive.

Section 5311: This program provides funds for use in non-urbanized areas. These funds may be used for planning, capital, operating, and administrative purposes. This grant program is managed by NYSDOT.

Federal regulations require a Designated Recipient of federal funds for each FTA program. The State of New York is the original Designate Recipient for all FTA programs in effect in Tompkins County. After the ITCTC was created in 1992, the State transferred some Designated Recipient responsibilities to Tompkins County based on an agreement between the City of Ithaca and the County.

The County’s primary responsibility as Designate Recipient is to use a process to solicit input from the public transportation operators and to propose projects or project revisions to the ITCTC for its consideration, approval and inclusion in the TIP (see FTA Transit Tables section in this document).

Designated Recipients for FTA programs in Tompkins County are shown in the following table:

FTA Program	Program Title	Designate Recipient	Eligible Activities
Sect. 5307	Urban Formula	Tompkins County	Operating assistance, capital and planning
Sect. 5309	Bus and Bus Facilities	Tompkins County	Buses and bus facility capital projects
Sect. 5310-urban	Seniors and Individuals with disabilities	Tompkins County	Programs and paratransit buses for target populations
Sect. 5310-rural	Seniors and Individuals with disabilities	NYSDOT	Programs and paratransit buses for target populations
Sect. 5311	Rural Grants	NYSDOT	Operating assistance and capital funds for rural transportation services

Tompkins County and NYSDOTA are FTA grant recipients for various programs. Recipients receive federal funding directly from FTA and are the only signatories to grant agreements with FTA. FTA holds recipients responsible for compliance with all applicable federal laws, regulations and directives. NYSDOT and the County are responsible for the performance of sub-recipients and third party contractors in their compliance with federal requirements.

Tompkins County is the FTA recipient for the Section 5307, 5309 and the urban allocations for the Section 5310 program. NYSDOT is the recipient for Section 5310-rural allocation and the Section 5311 program.

TIP FINANCIAL PLAN

Federal Regulations (23 CFR §450.324(h)) require inclusion of a plan that demonstrates how the TIP can be implemented and indicates financial resources that are expected to be available to implement projects in the TIP. Each Federal fund category is expected to be “fiscally constrained” by Federal Fiscal Year. Under fiscal constraint, the sum of the costs for all of the projects cannot surpass the level of funding that is committed or reasonably expected to be available to the Ithaca-Tompkins County Metropolitan Area by funding category (as per NYSDOT Region 3) for the 5-year planning period. Revenue and

costs estimates for projects in the TIP use inflation rates that reflect “year of expenditure dollars”.

The TIP section titled *Summary Charts and Tables* display data compiled from the *2017-21 Project Tables*. Information on the on the *Summary Charts and Tables* section shows that the 2017-21 TIP is fiscally constrained. Included in the *Summary Charts and Tables* section:

- Status of Projects from Previous 2014-18 TIP
- 2017-2021 TIP Distribution of Federal Funds by Fiscal Year by Fund Source
- 2017-21 TIP Distribution of funds by Federal Fiscal Year by Match Source
- 2017-2021 TIP Programmed Funding for 5-YR Program by Fund Source
- Total Funding by Fund Source

The funding data in the *Summary Charts and Tables* section, along with the *2017-21 Project Tables* constitute the financial plan for the TIP and include all the data required in the Federal Regulations, 23 CFR 450.324(h), to demonstrate that the TIP is financially constrained and that resources from federal, state and local sources are reasonably expected to be made available to carry out the TIP. New projects will only be added to the TIP when funding has been identified and secured.

The ITCTC, project sponsors and NYSDOT have worked collaboratively to provide some flexibility in the availability of funds across the program period. In particular, HSIP and Off-System Bridge funds will be aggregated for use since the distributed annual allocation is insufficient to accommodate projects. NYSDOT also agreed to supplement the ITCTC federal funding allocation to ensure completion of important projects. More details are noted under the *2017-2021 TIP Distribution of Federal Funds by Fiscal Year by Fund Source* table.

PROGRAM SUMMARY

The initial sections of the TIP provide an overview of the Metropolitan Planning Process in Tompkins County, followed by a description of the TIP development process and requirements. The impact analysis relates TIP projects with factors such as project location, family income levels, historic bridges and structures, minority populations, senior populations, and environmental factors. The purpose is to identify any disproportionate impacts to these areas of concern. The document also describes all the different funding categories that are programmed in the TIP. Finally, the components of the TIP Financial Plan are described.

The *Summary Charts and Tables* section of the TIP include a listing of projects from the previous TIP (2014-18) that were implemented and their status. It also presents the TIP project data in a cumulative format showing fund distribution patterns by fund source and sponsors, and tables displaying funding levels by year by funding source and funding match distribution.

The heart of the 2017-2021 Transportation Improvement Program is found in the *2017-2021 Project Tables* section that follows the *Summary Charts and Tables*. The projects are listed in order of their NYSDOT issued project identification number (PIN). This section includes individual tables for each project in the TIP. Individual project phase costs are given in *matched dollars* (unless otherwise noted). Each project page provides essential information regarding the project name, identification number, sponsor, and fund source(s). Each phase includes a date representing the proposed date (month/year) that federal funds are planned to be obligated to the project phase. This, at times, differs significantly with actual project implementation. It is essential to recognize that the “project sponsor” is the entity that will be responsible for providing the non-federal “match” for each project/phase and, in most cases, will be responsible for initiating and administering the project under a “local administration” agreement with NYSDOT.

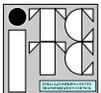

There are six Federal Fiscal Year columns on each table. The first column, labeled as "Obligated", represents project phases that have previously been obligated (i.e., funds have been released for their implementation). The next three columns (16/17, 17/18, 18/19) represent the mandatory triennial element of the TIP. The remaining two columns (19/20 and 20/21), are included for planning purposes.

Each program year (e.g., 16/17) represents the Federal Fiscal year, which begins on October 1 and ends on September 30. Federal Fiscal years are named for the year in which the fiscal year ends (e.g., FFY 17 ends September 30, 2017).

Following the project listings there is a section with tables summarizing the transit program for Tompkins County – *2017-2021 Federal Transit Administration Tables*. These tables show Federal Transit Administration grants by grant program across the planning period.

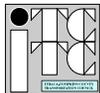

The final section of the document includes maps showing the geographic location of projects within Tompkins County. Mapped projects are limited to capital projects with defined project boundaries. Planning projects and maintenance projects with undefined locations cannot be shown in map format. Other maps show the distribution of projects and how they relate to the location of minority populations, low income households, senior populations, historic bridges and structures and environmentally significant areas and wetlands.

SUMMARY CHARTS AND TABLES

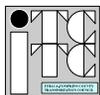

STATUS OF PROJECTS FROM PREVIOUS TIP – 2014/18 (as of June 2016)

PIN	Project-Name	Sponsor	Fund Source	Status
303318	Element Specific Bridge Repairs and Bridge Painting	NYSDOT	STP-FLEX,NHPP	COMPLETED

Surface Transportation Block Grant Flexible (STBG-Flexible)

Surface Transportation Block Grant Off-System Bridge (STBG-Off-System Bridge)

Highway Safety Improvement Program (HSIP)

Transportation Enhancement Program (TEP)

Notes:

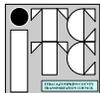

a) For the 2017-21 TIP update, NYSDOT agreed to supplement the ITCTC federal funding allocation to ensure completion of important projects. In total, NYSDOT provided an additional \$2,627,000 federal funds to the 2017-2021 ITCTC TIP allocation to ensure the TIP will remain fiscally constrained. These funds are distributed as follows:

- PIN 305758; RT 13 AT TRUMBULL CORNERS RD, TOWN OF NEWFIELD, TOMPKINS CO: \$330,000 HSIP for FFY 16/17. This extra amount was needed to fully fund C and CI for this NYSDOT project.
- PIN 305767; MBC RT 13/34/96 ELMIRA RD TO N. ITHACA CITY LINE: \$901,000 NHPP for FFY 19/20. This extra amount was needed to fully fund C and CI for this NYSDOT project.
- PIN 375611; BRINDLEY STREET BRIDGE REPLACEMENT PROJECT, CITY OF ITHACA: \$1,396,000 Off-System Bridge (\$56,000for FFY 16/17 and \$1,340,000 for FFY 17/18).

b) There is a single project, PIN 395050, which utilizes Transportation Enhancement Program (TEP) funds that were programmed during the last cycle for TEP funding. That project is scheduled for FFY 16/17.

c) The construction and inspection phases of one FLEX project, PIN 375593 CR110, ELLIS HOLLOW ROAD, are funded with roll-over funds from the previous TIP.

d) The construction and inspection phases of one HSIP project, PIN 375610 PINE TREE RD.-TWO INTERSECTION SAFETY IMPROVEMENTS, are funded with roll-over funds from the previous TIP.

Project Name Pine Tree Road - Two Intersections Safety Improvements

Sponsor Tompkins County

Description Pedestrian safety improvements at two intersections on Pine Tree Road: entrance of East Hill Plaza and at Ellis Hollow Road. The first will be addressed by adding a traffic signal with pedestrian signals. The latter will be addressed by relocating approximately 425 feet of a trail to terminate at the signalized intersection, adding a pedestrian signal, and eliminating the former mid-block crossing.

2017 – 2021 Federal Transit Administration Tables

**2017-2021 TRANSPORTATION IMPROVEMENT PROGRAM
FEDERAL TRANSIT ADMINISTRATION (FTA) PROGRAM SUMMARY TABLES**

06/2016

URBAN FORMULA (FTA 5307)		PIN#	FUND	2017	2018	2019	2020	2021	5-YEAR TOTAL
Preventative Maintenance	This project pays for spare parts and labor for preventative maintenance of TCAT's bus fleet.	382178	C09	846,404	846,404	973,620	1,002,829	1,002,829	4,672,086
ADP Hardware & Software	This project will replace or upgrade computers & software.	382080	C09	100,047	-	212,477	60,300	-	372,824
Facility Rehab	This project will replace or upgrade the HVAC, roof, air handling equipment for the facility.	382416			21,976	-	-	-	21,976
Short Term Transit Planning	Conduct passenger mile and other surveys for TCAT fixed route system for NTD reporting and route analysis.	382401	C09	-	-	130,000	-	-	130,000
Support Vehicle	This project replaces two (2) support cars to enable drivers to change work shifts on bus routes.	382124	C09	25,000	-	-	-	-	25,000
Mobility Management - County	This project provides for County planning and management of coordinated human service transportation, mobility management, JARC, Enhanced 5310 projects.	382278	C09	45,415	46,324	47,250	48,115	49,159	236,263
Project Administration - County	Reimburses County project administration costs of federal grants.	382099	C09	84,343	86,030	87,750	89,505	91,295	438,923
Mobility Management - Non-County (SCMP)	This project supports mobility management projects identified in the Coordinated Plan and local solicitation review process.	382417	C09	18,382	18,566	18,751	18,939	19,128	93,766
Mobility Management-Way2Go County (Rural)	Way2Go Mobility Management for Tompkins Co. A community mobility education and One Call-One Click service with 2-1-1 Tompkins/Cortland, contracted by Tompkins County. Sec 5311 Transfer.	382828	C09	212,000	216,000	220,000	224,000	228,000	1,100,000
Mobility Management-Way2Go County (Urban)	Way2Go Mobility Management for Tompkins Co. A community mobility education and One Call-One Click service with 2-1-1 Tompkins/Cortland, contracted by Tompkins County. Transfer from STP Flex.	375588	C09	53,000	54,000	55,000	56,000	57,000	275,000
Mobility Management - Way2Go - Regional	This project develops and implements a regional mobility management of up to 8 counties. Sec 5311 Transfer.	382832	C09	115,000	117,500	120,000	122,500	125,000	600,000
Mobility Management Upstate NY Community Mobility Training Conferences	This project develops and puts on two community mobility training conferences with a focus on Upstate NY.	382833	C09	-	33,000	-	33,000	-	66,000
Regional travel training	This project will implement a regional travel training program for human service agencies, their clients, and the public to learn to use public transit services and other mobility programs,	382834	C09	54,000	-	-	-	-	54,000
Mobility Management- Rideshare	Rideshare consortium of Cornell, I.C., TC3 and County implementing rideshare using Zimride/Enterprise.	382840	C09	10,000	10,000	10,000	11,000	11,000	52,000
Capital/Planning Projects Subtotal				1,563,591	1,874,800	1,874,848	1,942,037	1,942,604	9,197,880
FTA Sec. 5307 Capital (80%)				1,250,873	1,499,840	1,499,878	1,553,630	1,554,083	7,358,304
FTA Sec. 5307 Operating Assistance-TCAT				829,000	829,000	829,000	829,000	829,000	4,145,000
Operating Assistance Match				12,823,450	13,336,388	13,869,843	14,424,637	15,001,622	69,455,939
Operating Assistance - TCAT	Operating Assistance for TCAT	382404	C09	13,652,450	14,165,388	14,698,843	15,253,637	15,830,622	73,600,939
Operating Assistance - Special Community Mobility Projects (SCMP)	This project supports SCMP-eligible operating assistance projects identified in the Coordinated Plan and local solicitation review process.	382418	C09	147,056	148,526	150,012	151,512	153,028	750,134
Operating Assistance Subtotal				13,799,506	14,313,914	14,848,855	15,405,149	15,983,650	74,351,073
Total Section 5307 Program				15,363,097	16,188,714	16,723,703	17,347,186	17,926,254	83,548,954

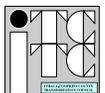

BUS & BUS FACILITIES (FTA 5339)		PIN#	2017	2018	2019	2020	2021	5-YEAR TOTAL
Bus & Bus Facilities	Purchase TCAT Replacement Buses (qty: 1.5)	382419	131,250	5,000,000	131,250	131,250	131,250	5,525,000
Total Section 5339 Program			131,250	5,000,000	131,250	131,250	131,250	5,525,000

ENHANCED MOBILITY OF SENIORS & INDIVIDUALS WITH DISABILITIES (FTA 5310 - Urban)		PIN#	2017	2018	2019	2020	2021	5-YEAR TOTAL
New Freedom Operating Assistance	This project supports Gadabout's New Freedom service.	382421	80,000	82,000	84,000	86,000	88,000	420,000
Gadabout Operations Management Technology	Customer management, dynamic scheduling and optimization of trips. Computer assisted dispatch. Real time bus location information.	382835	-	125,000	-	-	-	125,000
Gadabout Replacement Buses	This project purchases GADABOUT replacement buses identified in the Coordinated Plan.		30,000		30,000	30,000	30,000	120,000
Total Section 5310 Program			110,000	207,000	114,000	116,000	118,000	665,000

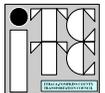

ENHANCED MOBILITY OF SENIORS & INDIVIDUALS WITH DISABILITIES (FTA 5310 - Rural)		PIN#	2017	2018	2019	2020	2021	5-YEAR TOTAL
