

Q1. We are a project of a larger organization, who carries the 501(c)3 for our organization. Effectively, the our employer is the larger organization, and any young people hired for the positions funded with this award would be employees of the umbrella organization, and who work directly, specifically and only w. our program.

I wanted to check w. you to see if this would be an appropriate application, given that scenario. Have you had any organizations with similar situations receive funding in the past? Do you see any issue with this?

A. Any organization wishing to respond to the Summer Youth Employment Program Request for Proposals would need to be a legal entity that Tompkins County can contract with. As long as the applicant for the grant, as well as the signatories to the grant documents, and the entity Tompkins County is contracting with is the umbrella organization there would be no problem

Q2. We currently are an employment site for YES, etc. If we were to apply for funds directly from WorkForce to hire our own youth, and received them, would we still be able to accept youth through other programs, such as YES, etc., as a work site? Can we be/do both?

A. There is no prohibition against an organization being a contractor for the Summer Youth Employment Program as well as a worksite for another contractor's Summer Youth Employment Program.
