

Rabies Control Program

There was one confirmed case of rabies in Tompkins County during May 2015. A rabid bat was caught by a cat. Fortunately, the cat has a current rabies vaccination and only required a booster shot. It is important to keep pets vaccinated for rabies even if they are kept indoors only.

The Tompkins County Health Department held free rabies clinics in Lansing, Danby, Dryden, Enfield, and Ithaca during May, 2015. 347 Dogs, cats, and ferrets were vaccinated against rabies during these clinics.

Key Data Overview				
	This Month	YTD 2015	YTD 2014	TOTAL 2014
Bites¹	14	69	45	167
Non Bites²	6	7	14	86
Referrals to Other Counties	1	11	12	43
Submissions to the Rabies Lab	21	60	41	190
Human Post-Ex Treatments	7	14	19	103
Unvaccinated Pets 6-Month Quarantined³	0	2	0	0
Unvaccinated Pets Destroyed⁴	0	0	0	0
Rabid Animals (Laboratory Confirmed)	1	4	2	12

¹"Bites" include all reported bites inflicted by mammals and any other wounds received while saliva is present.

²"Non-bites" include human exposures to saliva of potentially rabid animals. This also includes bats in rooms with sleeping people or young children where the bat was unavailable for testing.

³When an otherwise healthy, unvaccinated pet has contact with a rabid animal, or suspect rabid animal, that pet must be quarantined for 6 months or euthanized. Quarantine must occur in a TCHD-approved facility (such as a kennel) at the owner's expense. If the pet is still healthy at the end of 6 months, the exposure did not result in rabies and the pet is released.

⁴ Pets must be euthanized if they are unvaccinated and have been in contact with a rabid or suspect rabid animal and begin to display signs consistent with rabies. Alternatively, a pet is euthanized if a prescribed 6-month quarantine cannot be performed or the owners elect euthanasia instead of quarantine.
