

Rabies Control Program

There were no confirmed cases of rabid animals in Tompkins County during December.

Key Data Overview		
	This Month	YTD
Bites¹	7	275
Non Bites²	1	98
Referrals to Other Counties	6	64
Submissions to the NYS Rabies Lab	11	187
Human Post-Exposure Treatments	2	118
Unvaccinated Pets 6-Month Quarantined³	0	6
Unvaccinated Pets Destroyed⁴	0	1
Rabid Animals (Laboratory Confirmed)	0	13

¹ "Bites" include all reported bites inflicted by mammals and any other wounds received while saliva is present.

² "Non-bites" include human exposures to saliva of potentially rabid animals. This also includes bats in rooms with sleeping people or young children where the bat was unavailable for testing.

³ When an otherwise healthy, unvaccinated pet has contact with a rabid animal, or suspect rabid animal, that pet must be quarantined for 6 months or euthanized. Quarantine must occur in a TCHD-approved facility (such as a kennel) at the owner's expense. If the pet is still healthy at the end of 6 months, the exposure did not result in rabies and the pet is released.

⁴ Pets must be euthanized if they are unvaccinated and have been in contact with a rabid or suspect rabid animal and begin to display signs consistent with rabies. Alternatively, a pet is euthanized if a prescribed 6-month quarantine cannot be performed or the owners elect euthanasia instead of quarantine.
