Thank You!

TOMPKINS COUNTY

The Tompkins County Health Department would like to thank all of our residents, local businesses, and organizations for your efforts throughout this pandemic. Our community is healthier and safer because you have done your best to follow the guidance, encourage vaccination and masking, and be generous with your time and kindness.

Please be safe this holiday season and follow these familiar steps

Get vaccinated | Wear a mask in indoor public places
Maintain social distance and avoid crowded areas | Wash hands frequently
Monitor for symptoms | Get tested if symptoms develop

EVERYONE AGE 5 YEARS OLD AND UP can get vaccinated! Visit your local pharmacy for first and second shots, and booster doses! The vaccines will lower your risk of severe disease, hospitalization, and death, and they might also reduce the chances of spreading COVID-19 to others, including your own family, friends, and loved ones. Don't wait! The vaccine is free to everyone! Scan the code for more about where to get vaccinated.
