Tompkins County Overview

Tompkins County is located in the south central portion of New York State at the south end of Cayuga Lake. Upon its founding in 1817, the county was named after Daniel D. Tompkins, the 4th Governor of New York and the 6th Vice President of the United States.

As of the 2010 Census, the County has a population of 101,564 and a land mass of 460 square miles; equaling a population density of 221 people per square mile.

Unlike most other counties in New York State, Tompkins County has enjoyed population growth over the last decade. The presence of large institutions of higher education, including Cornell University, Ithaca College, and Tompkins-Cortland Community College, has provided a degree of population and economic stability that distinguishes the County from many other areas of the State.

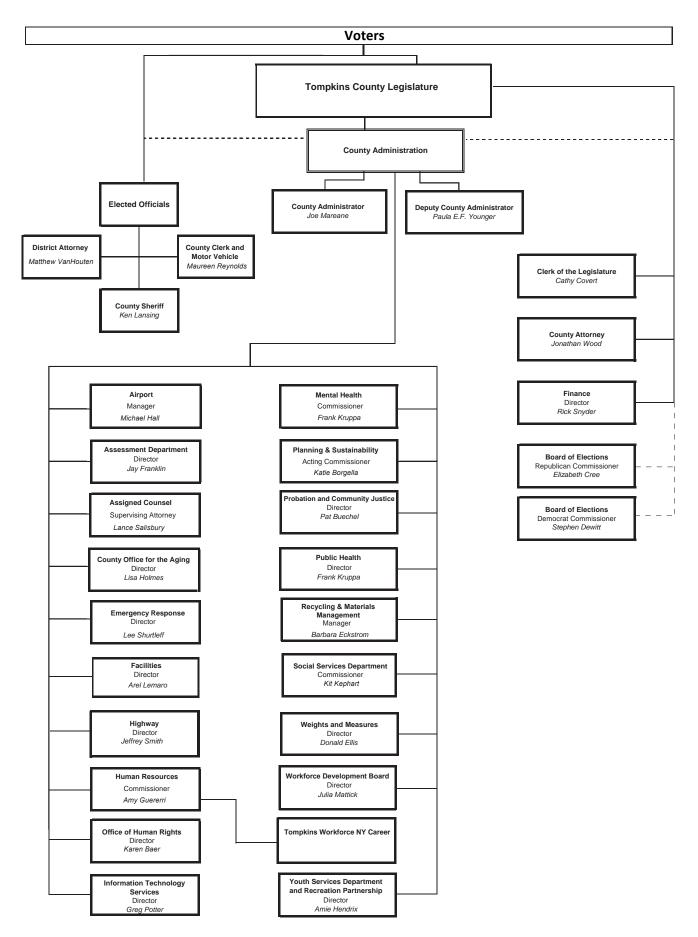

The County has an extensive transit network anchored by a public bus system, Tompkins County Area Transit (TCAT), and the Ithaca Tompkins Regional Airport. The County is served by several major State highways. The Ithaca Bus Terminal also connects the area to the surrounding regions and has direct service to New York City.

Within the county, there are five local newspapers that are published from a daily to a weekly basis. These include: The Ithaca Journal [1814, daily], The Cornell Daily Sun [1880, daily], The Ithacan [1932, weekly], and The Ithaca Times [1979, weekly], and the Tompkins Weekly [2006, weekly]. The Cornell Daily Sun and The Ithacan are student-run publications through Cornell University and Ithaca College respectively.

Tompkins County is governed under home rule, which provides for the separation of the Legislative and Executive Branches of government. The Tompkins County Charter was approved in 1968 and took effect in 1970. The County has a legislature-administrator form of government where a 14-member legislature elected from single member districts appoints a County Administrator who "oversees and coordinates the operations of county government to successfully carry out the policies of the County Legislature." Legislators are elected to four year terms. Other elected officials include the District Attorney, Sheriff, and County Clerk.

The County is composed of: nine townships – Lansing, Groton, Dryden, Caroline, Danby, Newfield, Enfield, Ulysses, and Ithaca; six villages – Cayuga Heights, Dryden, Freeville, Groton, Lansing, and Trumansburg; and one city – City of Ithaca, which is also the county seat with a population of 30,014.

Project Description

Years of under funding maintenance budgets and under investing in County owned facilities have caused a significant backlog of deferred maintenance. This request is intended to address the backlog of deferred maintenance that currently exists in the County's facilities and to accomplish it over the next several years.

This is a short-term remedial program of deferred maintenance reduction. Once completed ongoing facility maintenance needs in future years will need to be addressed. If on-going needs are not addressed, the county will likely be faced with the same problem in future years. Funds will be used to correct deficiencies on facilities in worse condition in order to prevent further and frequently accelerating deterioration.

In the Updated 2013 Capital Improvement Plan, \$4 million was to be invested in these projects over a seven year period from 2014-2020. (\$800,000/year in 2014-2016 followed by \$800,000/year in 2019-20). It is proposed that the same \$4 million be invested over a five, rather than seven, year period from 2014-2018. The two year "pause" in investments would occur in 2019-20. The second cycle of \$4 million over a seven year period (2021-2027) begins with an \$800,000 investment in 2021.

Project Description

The Tompkins County Health Department does not currently have handicap or stroller access from the nearest TCAT bus stop. We have clients that are forced to use the entry road from Brown Road as pedestrian access because the sidewalk does not have cutouts to allow wheelchairs or strollers. This capital project would strengthen the access road from Brown Road as well as the parking lot at the Health Department to allow a TCAT bus stop to be created at the front door. We have a large number of clients that use or would use public transportation. In particular our WIC program has successfully advertised on the TACT buses to attract future participants. The challenge of not being located downtown has been addressed by many Health Department programs in many different ways. Bus access will make our facility more accessible to our clients.

Project Description

Tompkins County implemented the Infor HR/Payroll solution in 2010 based on an extensive, multi-departmental RFP process. Since this implementation the Information Technologies Department (ITS) has provided on-premise hosting of the application and direct support for the system, including budgeting for the annual software contracts, governance and expanded configuration of the system to meet the evolving requirements and mandates of the Human Resources and Finance Departments, the continuous roll-out of numerous software patches, and a significant software upgrade and server replacement effort completed in 2014. Recently, ITS has successfully coordinated other software projects under a Software as a Subscription (SaaS) model, which is based on the hosting of the application by the software vendor in their managed data centers. The SaaS model is now offered by Infor and recommended by ITS as the best alternative for the long term support and advancement of the Tompkins County HR/Payroll system. Although the annual SaaS contract will be more expensive than the current annual software support agreement there are many advantages. These include: software companies have standardized on this model and often deploy new releases or functionality of their software first to their SaaS customers; cost and support of hardware, operating systems, software patches/upgrades, and backup and disaster recovery requirements are included in the SaaS model; the County can request future configuration changes in conjunction with Infor, as ITS will be impacted based on expected personnel and retirement changes in next two years. Project Description

Industry standards for the replacement of server hardware are typically in the range of five years. The Tompkins County Information Technologies Department (ITS) began the implementation of virtual server technology in 2010; the finalization of hardware to support this effort was installed no later than 2013. Since 2010, ITS has converted about 40 physical servers located at 8 locations and centralized these servers, using virtual server technology, into two data centers. The server hardware used during the implementation of virtual server project is now between 5-7 years of age and prioritized for replacement as a Capital Project in 2018.

In addition, this project would include the replacement of 4 critical, physical servers for the Department of Emergency Response (DOER) installed in 2010. ITS and DOER are still investigating the preferred solution for this project. Current estimates for this additional project component are based on the cost to replace these 4 physical servers, but virtualization of these servers and consolidation in the two County data centers is being investigated.

Project Description

In partnership with the United States Geological Survey, Tompkins County initiated an aquifer study program to help protect Tompkins County's groundwater resources and drinking water supplies. County funds from this program leverage Federal funds to conduct consecutive studies of individual aquifers in the County. Participating municipalities also provide a portion of the necessary funding. The products of the studies are unique to each aquifer and generally include investigation of surface water and groundwater interaction, groundwater movement, and vulnerability of the respective groundwater resources.

Project Description

The Natural Infrastructure capital project is a multi-year capital program to provide funding for projects that address flooding and surface water and groundwater quality and/or quantity issues in Tompkins County. The Natural Infrastructure capital project is focused on protection, by acquisition, easement, restoration and/or stabilization, of: upper watershed forests and wetlands; stream corridors and floodplains; and aquifer recharge areas. The objectives are to: (1) protect and enhance those natural systems that can help to mitigate the impacts of intensive rainfall events that are expected to continue to increase as a result of climate change; (2) help decrease sediment loads in streams and Cayuga Lake; and (3) protect overall water quality in streams, surficial aquifers and Cayuga Lake. Additional benefits could include improved wildlife habitat and recreational opportunities. The program may also help to fund demonstration green infrastructure projects on County properties.

Among specific types of projects that could be funded totally or in part from this project:

• Acquiring and monitoring conservation easements on private forest lands, wetlands, and stream corridors in the upper reaches of watersheds of streams (primarily 1st and 2nd order streams) that ultimately flow into populated areas such as the City, villages, and hamlets. Projects in the Chesappeake Bay watershed may be considered if matching

funding is available. This would ensure that these lands continue to act as natural sponges that hold rainwater and delay runoff during storms, as well as reduce sedimentation and contamination that might impact downstream public or private water supplies.

- Property easements, land acquisitions, planning, design, and construction of measures, to reconnect 3rd and 4th order streams to their natural floodplains. The objective is to reduce the rate of flow to developed areas and allow some sediment to settle out before it reaches the flood control channel or Cayuga Lake. Projects in the Chesapeake Bay and Owasco Lake watersheds may be considered if matching funding is available.
- Planning, design, and restoration of stream banks, and establishing and planting stream buffers to hold and retain sediment, especially during storm events.
- Demonstration of innovative road ditch management techniques, such as check dams, on County highway ditches that would retain sediment before it enters streams and which, if successful, could become standard practice going forward
- Demonstration projects to address stormwater runoff issues at County buildings in ways that detain water on-site and help avoid overloading storm sewers or drainage ways in intensive rain events.
- Protection of aquifer recharge areas through easement or ownership depending on the sensitivity of areas to contamination and likely impact on public and private water supplies.
